DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 1–13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, claim 1 first requires each of the unit electrodes to include a plate-like ceramic body and a conductive film disposed inside the ceramic body (see lines 6–7). Then, the claim discusses the unit electrodes further including a deficient unit electrode in which the conductive film is absent (see lines 7–9). However, this appears to contradict the earlier requirement that each unit electrode have a conductive film disposed inside. As a result, the claim language is unclear with respect to the unit electrodes.

Despite the above mentioned ambiguity, the examiner is interpreting the claim to merely require the deficient unit electrode, while still having a portion with a conductive film disposed within the ceramic body, to have a second portion which does not have a conductive film disposed within the ceramic body extending in the one direction forming the deficient gas space. See figure 1b; ¶29 and ¶30 of applicant's specification.

Allowable Subject Matter

Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter: The prior art fails to teach a plasma generating electrode having the claimed structure which is capable of generating different intensities of plasma within the plasma generating electrode due to the differing distance between electrode units.
